GENERAL RULES FOR THE N.C. TEAM-SPRINT COMPETITION – ROAD TO THE OLYMPICS

The event has a DEMONSTRATIVE CHARACTER as this format is still not regulated by the FIS (Italian Ski Association).

Male, female and mixed couples of athletes belonging to the years of birth 2007-2008-2009-2010 are admitted. The ski jumping competition round will take place on the HS66 hill at the Giuseppe Dal Ben stadium while the roller ski competition round will take place on a 850 meters long course closed to the football stadium of Predazzo.

A team consists of two competitors who must participate in and complete both disciplines (Ski Jumping and Cross-Country).

Competitors from each group will jump from the same starting gate regardless of gender or age.

The team should be formed by athletes belonging to the same FIS regional committee. For athletes coming from foreign countries the team must be between athletes of the same nation. Any team between athletes of different FIS regional committees or different countries will be admitted to the competition as well.

A maximum number of 20 couples are admitted to the competition. Competition-vouchers will be assigned according to the chronological entry order. The entries must be communicated in writing form by e-mail to the address dolo@usdolomitica.it not later than 8.00 pm on Thursday 27.10.2020. The order in which the athletes will jump in the competition round must be specified in the entry request. It is not possible to communicate entries for the Team-Sprint competition through the FIS portal. The entry fee is Euro 30.00 (20.00 + 10.00 for the use of roller skis) for each named team.

For the ski roller competition round, which will take place with the traditional Gundersen formula, each athlete will repeat the circuit 4 times (2 x 3.4 km). At the end of each lap the racing competitor will change to his teammate. The possibility of repeating more laps in a row by the same athlete is excluded. The alternation between the teammates is mandatory. The overlapped teams are allowed to compete until the end of the 8 scheduled laps, but during the overlapping phase the chased competitor will have to facilitate overtaking by granting the right to the track to those arriving from behind.

The gap in the ski jumping competition round will be converted into a delayed starting time for the roller ski race (Gundersen method) in the ratio of one minute every 25 (twenty-five) points of delay.

Within 5 minutes after the end of the ski jumping competition round the coaches must communicate to the Chief of Competition the order in which the athletes of each team will be lined up in the skiroll competition round.

The change will take place by touching between the teammates, which must take place within the transition area. The athlete who finishes his leg will have to reach the waiting place at the start of

the transition area assigned to his team as soon as possible. In the waiting place the athletes can receive technical and medical assistance if necessary. Only one technician or coach for each team is admitted to the waiting area.

For the skiroll competition round it is mandatory the usage of the ski roller provided by the organization.

SKIROLL COURSE FOR THE NORDIC COMBINED TEAM-SPRINT RACE

Start in via Lagorai near the parking area above the football field, go up via Lagorai to the intersection with via Hallbergmoos, where competitors will turn right to join the cycle path. As soon as the competitors will pass the sports field, after running along the bio-lake, the athletes will turn right along the ramp that descends into the parking place, which will be crossed diagonally. At the end of the parking area, the athletes will return to via dei Lagorai going back to the starting and arrival point.
